# Welcome to the SafetyIQ Testimonial Report

---

In a world where safety and efficiency are paramount, finding the right solution to manage and enhance safety protocols can be a daunting task. Businesses, both large and small, often grapple with the challenge of safeguarding their operations while ensuring compliance with industry regulations. It's within this landscape that SafetyIQ, a pioneering force in safety management software, emerges as a beacon of innovative solutions.

As you embark on your journey to explore the realm of safety management software, we invite you to delve into our comprehensive and insightful Testimonial Report. This report stands as a testament to the transformative experiences shared by our esteemed clientele, who have harnessed the power of SafetyIQ's cutting-edge software solution.

What sets this report apart is its authenticity. Every piece of information contained within these pages, from glowing quotes to impactful case studies, stems directly from the voices of our valued customers. No filters, no edits – just unadulterated accounts of their experiences. The goal is clear: to provide you with a window into the real-world applications of our software and its tangible benefits.

So, without further ado, let's delve into the world of SafetyIQ and the profound impact our Safety Management Software Solution has had on businesses like yours. - Hopefully I answer some of your questions along the way!

## Ease Of Use

Given that technology shapes the very fabric of our work environments, concerns about complexity and usability are understandable. The implementation of new software solutions often raises questions: Will it be difficult to use? What if our staff aren't technologically savvy? These apprehensions resonate deeply, as businesses seek to streamline operations without encountering the steep learning curves that can accompany novel technologies.

However, at SafetyIQ, we don't just focus on robust features and capabilities. We are also committed to creating a solution that is user-friendly and accessible. Don't take our word for it - let's see what our customers have to say:

### Testimonials:

*"I couldn't be happier with the solution the team at SafetyIQ provided us with. The user interface looks clean and is easy to use, and the technical support from the SafetyIQ team has felt like a partnership from day one."*

**Steve Cucé**  
Head of Zero Harm, Downer

*"SafetyIQ provides our business a streamlined and visible solution with a user-friendly interface."*

**Shane Watson**  
WA Regional & Mining Manager, Land Surveys

### Capterra:

*"We were most impressed with the ease of use and flexibility of the SafetyIQ platform. The team has been great to work with addressing any issues we had quickly. I would highly recommend this software to anyone in the health and safety field."*

**Shawn**  
EHS leader in the Manufacturing Sector

*"The ease of use is a big pro. The drag down options and autofill options make it really easy to fill out the incident reports/Safety audits. Also the ability to use on mobile devices comes in handy a lot."*

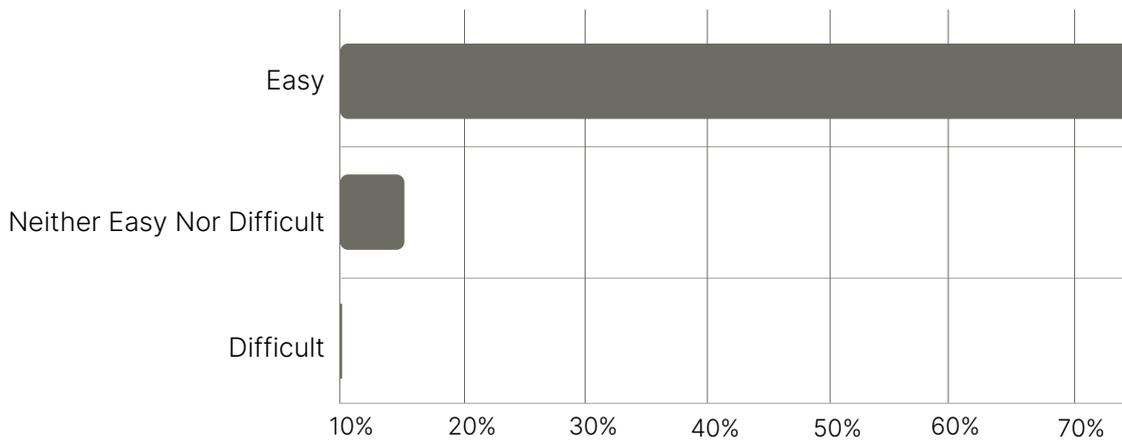

**Gregory**  
Product Supervisor in the Utilities Sector

## Survey:

In 2023, we surveyed all current users with a total of 90 responses. Below are the results based on the question: How easy is it to navigate the app? 75% of respondents felt it was easy.

### How easy is it to navigate the app?

## Paper-Based Vs Digital

---

The debate between paper-based and digital solutions is a prominent one. Many potential clients, accustomed to paper-based safety management processes, often question the benefits of going digital. While paper has its merits, the transition to a digital solution offers undeniable advantages. But what do our customers have to say?

### Why should I implement digital solutions like SafetyIQ over paper-based options?

---

*"By doing away with the pens and paper of a manual call-out system, we have simplified our safety management procedure in a timely and cost-effective manner."*

**Sandvik Rock Tools**

*"Long gone are the days of spreadsheets and paper forms. Using the software has simplified administrative duties tremendously!"*

**Matt Giordano**  
**HSE Manager at Palfinger**

*"Workers Comp direct cost alone has been reduced by almost one million dollars in the last 2 years so I would say there is plenty of evidence of what a good safety management system can do to benefit a company."*

**Kelli MacDonald-Risner**  
**Regional HSE Manager at PALFINGER**

*"It is certainly better than a system reliant on human interaction"*

**Michael O'Reilly**  
**Sandvik Rock Tools**

*"It reduces the paper trail and pressure on supervisors."*

**James Simcoe**  
**Goodline**

## Will SafetyIQ make you more efficient? Or is it just extra work you don't have time for?

---

*"The Powerlink team now have improved the visibility of their workforce and have significantly reduced the burdensome administrative process. We estimated that we gained back 1000 hours using SafetyIQ within 6 months"*

### **Powerlink**

*"Rather than relying on a single safety contact to undertake all safety procedures, employees can now manage audits, inspections, incidents, and observations in the field and from any device. This made their processes more efficient and engaged every employee in contributing to the overall health and safety."*

### **Matt Giordano** **HSE Manager at PALFINGER**

*"SafetyIQ enables us to integrate our existing processes into a digital format making it quicker and easier for our people to safely undertake work-related travel."*

### **Ian** **Assurance Manager in the Oil & Energy Sector**

*SafetyIQ has reduced duplication in our process, eliminated the need for a call-in process and allows our supervisors to save approximately two hours per week (104 hours per year) to focus on other key areas of the business".*

### **Chris Verran** **HSE and Business Services Manager, Wallis Drilling**

*"As an EHS Manager- it's saved me time and now I can get to the things I love. Like leaving work at the end of the day and feeling accomplished or just on time. Saying goodbye to the 70-hour weeks is the best feeling! And getting caught up on the administrative burden is nice! We're 6 months into implementation and I can't wait to see where we are at in a year."*

### **Shelby** **EHS Manager in the Utilities Sector**

*"Communication features and ease of use have saved our organization time and effort in tracking and documenting our processes."*

### **Mark** **Senior HSE Specialist in the Automotive Industry**

# The Onboarding Experience

---

Implementing new software for your business can be a daunting task. The transition to a new solution represents not just change, but a potential transformation of operations. Onboarding brings forth concerns about disruption, unfamiliarity and the learning curve associated with new technology.

At SafetyIQ we recognize the common challenges that businesses face when adopting modern solutions. That's why our dedicated team ensures a smooth and supported process.

See what our customers had to say:

## Testimonials:

*"The transition was one of the easiest undertaken for change management – excellent support from the SafetyIQ team."*

**Sandvik Rock Tools**

*"With very little training, the initial SafetyIQ users were on boarded within 24 hours and incorporated key representatives from the Executive team to include, CEO Peter Bennett. Leading from the top has enabled Clough a successful onboarding across the business, with the recognition that SafetyIQ is a safety solution for any team member who has the requirement to travel."*

**Roberta Selleck**  
**HSSE Manager at Clough**

*"BMD's expectation of SafetyIQ was met from its very first implementation; ease of sign-up and usability for all subcontractors was vital to its success."*

**Safety Manager at BMD**

*"The expertise of SafetyIQ's dedicated team allowed for an efficient and seamless onboarding. SafetyIQ provides effective solutions to complex risk while allowing our organisation to adjust processes to suit our needs."*

**Rachel Zerk**  
**HSE & Systems Advisor at Novus Fuels**

## Capterra:

*"SafetyIQ's implementation team worked one-on-one with us allowing us to modify and trial different setups as we went along, getting us to a layout that we all felt comfortable with, instead of a cookie cutter approach. They have a team that is highly focused on customer service and were very easy to work with."*

**Melynda**  
**Plant Manager in the Consumer Goods Industry**

*"This has been the smoothest implementation of any process I have ever brought into a company in my 15 years. I wish I would have know of this software my whole career."*

**Jordan**  
**Safety Supervisor in the Food & Beverages Sector**

*"I have been extremely pleased with the functionality and customer support. SafetyIQ's customer support is one of the best that I have ever dealt with. I typically have a response within hours of an email."*

**Ethan**  
**EHS Manager in the Machinery Sector**

*"The SafetyIQ support team are first-rate and always on hand to resolve any issues and to provide ongoing education and training for users to help them get the most out of the software."*

**Ian**  
**Assurance Manager in the Oil & Energy Sector**

## User Feedback:

*"The support provided by the SafetyIQ team is above and beyond! Especially seeing this dingdong set up on phone and typed the wrong email to register. The follow up call received was helpful and hilarious."*

**Jodi Hamilton**  
**Department of State Development, Infrastructure, Local Government and Planning**

*"Easy to use, good user guide and responsive support staff!"*

**Madeleine Bismire**  
**MPC Kinetic**

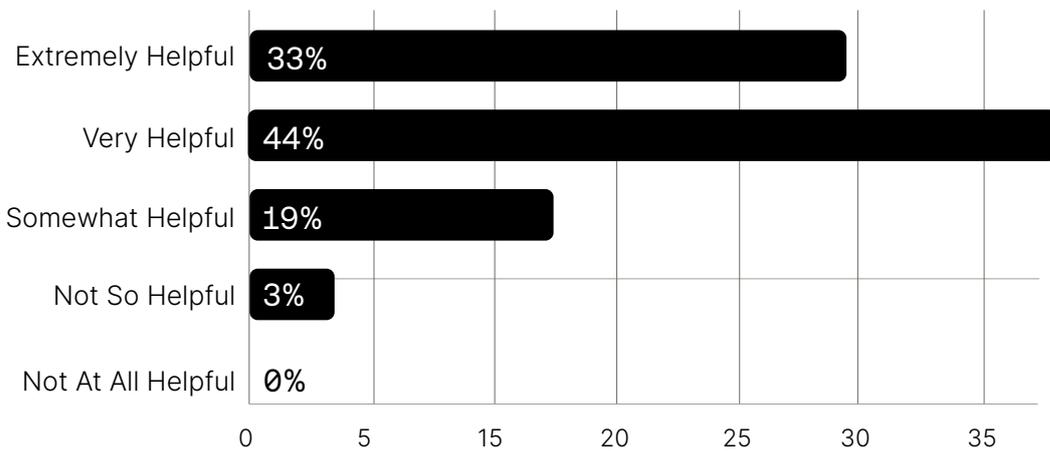

*"Easy to use and the company is responsive to any issues encountered."*

**Michael O'Reilly**  
**Sandvik Rock Tools**

## Survey:

From the same 2023 Survey, we asked questions based on our users' experience with the dedicated onboarding and support team. The majority of respondents (77%) selected Very Helpful or above.

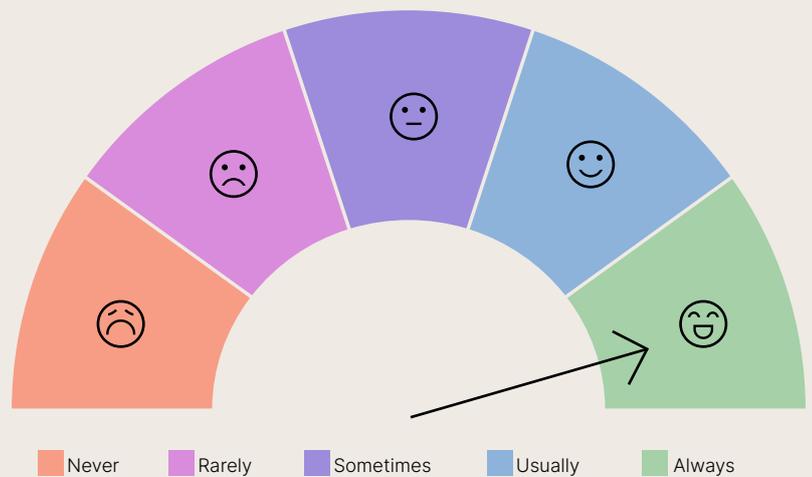

Based on your experience, how helpful is our support team?

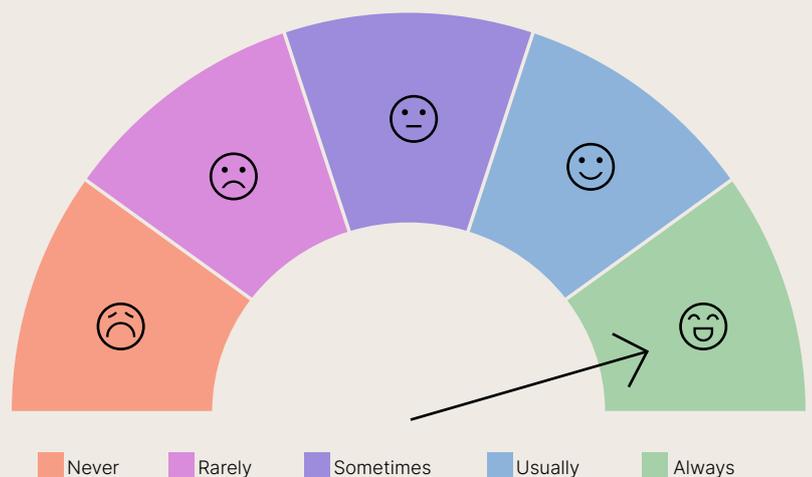

Following this, respondents were asked to give their opinions on the service team's consistency. They were prompted as "Overall, I feel the service team..." then given the context (e.g. communicates effectively). They could choose between Never, Rarely, Sometimes, Usually and Always. See below the results:

Prompt: Overall, I feel the service team...

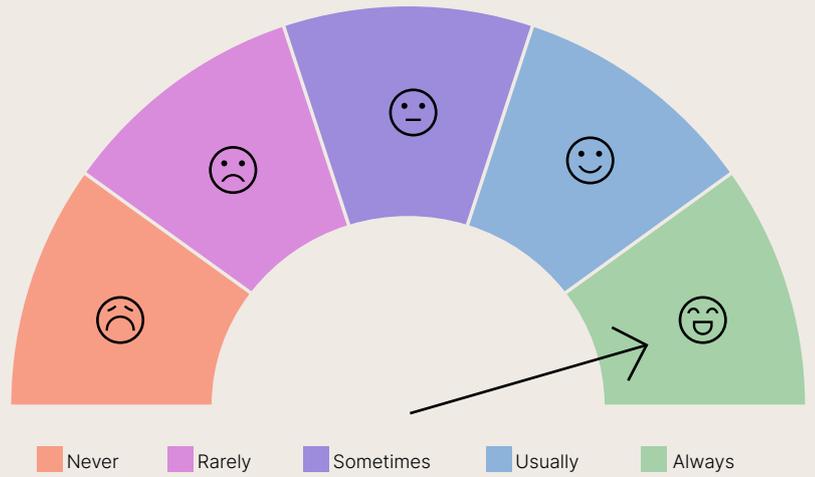

**Communicates effectively.**

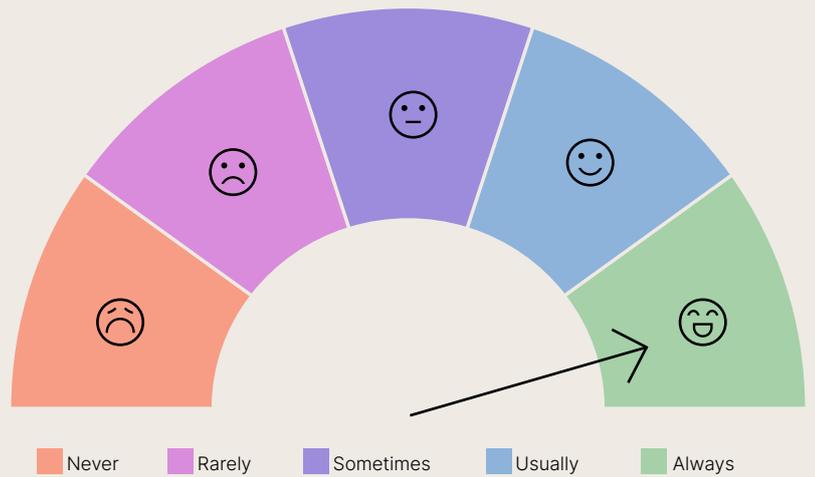

**Takes the time to understand my needs.**

**Is knowledgeable  
of product  
offerings.**

**Wants to see me  
succeed.**

## Will it be hard to get buy-in from staff?

*“The staff knew we as a business had their best interests in mind. Many of our team members had already known of SafetyIQ having used the software when out on site with RTIO. It was already familiar and known as an ‘easy to use solution’. Interestingly, some of the guys ‘tried it on’ so to speak. They deliberately failed to check in to see if the system worked and to their surprise it did. The failed check-ins are escalated and personnel are contacted accordingly to confirm safe arrival at their planned destination.”*

*“SafetyIQ has been well accepted by all personnel. We now apply a system where at the end of the day, we know all personnel have returned home to their loved ones or back to camp safely.”*

**Emma Cullen**  
**Employee Relations Manager at Topdrill**

*“As the manager of a plant, my main concern was how well will the plant floor embrace the software and use it. The initial roll out went seamless and our production supervisors and leads love the new platform. Very user-friendly and we were able to modify the look and feel to custom fit our needs. We have reviewed many other packages and this one beats all the rest based on its simplicity, it gives you what you need without creating a labor of data entry points.”*

**Melynda**  
**Plant Manager in the Consumer Goods Industry**

*“The whole team was experiencing significant change during this time, including the rapid growth of the team, and some were anxious about using the new technology and changing the way we did things in the region. It was seen as more change upon more change by some team members, however, perspectives quickly improved. In the end, all team members rated SafetyIQ as the best initiative of the year”*

**Renée McAllister**  
**Regional Director North Queensland at Act for Kids**

*“SafetyIQ was simple for our people on the shop floor to use which made its adoption seamless. Now the data rolls up to management giving the Safety Team the insight needed to get in front of issues.”*

**Jane B.**  
**Safety Director at a Pharmaceutical Construction Company**

## Travelling, Lone and Remote Workers

Do you have travelling workers? Well, a lot of our customers do as well. They came to us struggling with visibility, unreliable and inefficient processes, as well as the general concern for their workforce's safety, given the high risk they face. So how did we solve this for them?

### How have we increased the safety of our customers travelling, lone and remote workers?

*"The challenge was making sure supervisors and managers knew their people were safe. Employees are situated in various locations across the country. SafetyIQ supported the company by relieving the pressure on supervisors to make many calls to check-in with employees daily."*

#### **Epiroc**

*"Since its implementation it has proved to be a worthy addition to our management system and provides management with the peace of mind their workers have returned home or back to camp safely."*

**Shane Watson**  
**WA Regional & Mining Manager for Land Surveys**

*"A helpful tool to track employees while they are travelling about on site work, especially in remote areas and when there is substantial amounts of travel involved."*

**Vivesh**  
**Senior Project Consultant in the Civil Engineering Sector**

*"SafetyIQ is a vital tool as we manage the risk of having solo workers travelling across multiple client sites. It also provides a clear and concise record of on-site service appointments for compliance – to assure the client we are managing the risk."*

#### **Sandvik Rock Tools**

*"Those who manage travellers have peace of mind that they will be notified if there is an issue. You're able to set and forget. Then you have a visual representation of where all the travellers are located."*

*"We have found SafetyIQ to be a functional, practical solution that works well for us"*

**Sean O'Connell**  
**HSE Supervisor, Jansz-lo Compression Project**

## User Feedback:

Safe way of accounting for return on employees.  
James Burrow, KCM

Great idea, feel safe using it.  
N. Jones, Western Power

It's a safe way to travel on crew change day.  
Ballsy, At Live

It supports the safety of employees.  
Daniel Noble, Tafe QLD

I feel safe!  
Ted Taylor, Act For Kids

It keeps me safe.  
Eileen Doyle, Act For Kids

It's a good tool for tracking your safety.  
Deep Shankar, Rio Tinto

It keeps me safe.  
Warrik Jones, Rio Tinto

Keeps me safe.  
Hammad Fahimi, Rio Tinto RMP

## Has communication improved with your travelling, lone and remote workers?

*"It's good to let Rio Tinto know the journey you are about to take and that you have returned back to camp safe"*

**Shanon Hanrahan, Rio Tinto**

*"Whether your Bear Grylls or just going fishing, it's good to let someone know where you are. Anyone can get stranded, lost or injured at any time."*

**Jake Graham, MPC Kinetic**

### Capterra:

*"Messages are only sent to supervisors when a journey has not been acknowledged in accordance with travel plans, which avoids unnecessary notifications."*

**Andrew, Senior Safety Advisor in the Mining & Metals Sector**

*"It notifies someone when you did not show up back in the office and gives you a sense of protection"*

**Gilbert Bascos, Rio Tinto**

*"It's good to know someone will activate a team if no check-in is completed"*

**Michael Walker, Rio Tinto**

*"I can track my team's travel with my smart phone. In the event of an unplanned travel delay, I can get updates on my smartphone."*

**James, Business Manager in the Oil & Energy Sector**

## Can you still monitor worker safety in areas with no mobile coverage?

*“Without GPS capability, users are required to check-in at 2-hour intervals. This allows BMD to be able to locate travellers across a short distance, should an incident occur.”*

**Safety Manager at BMD**

*“SafetyIQ’s GPS Device integration has significantly improved our journey management when working in remote areas.”*

**Bryce McLaren**  
**HSE Manager at Buru Energy Limited**

*“Since the implementation of SafetyIQ and pairing it with our IVMS system, we have been able to identify, learn and improve other areas of our business that would not have been as visible without the integration of these systems.”*

**Shane Watson**  
**WA Regional & Mining Manager at Land Surveys**

## Using an EHS System

---

In the realm of Environmental, Health, and Safety (EHS) management, navigating the complex terrain of audits, inspections, incident reporting, safety observations, hazard identification, training tracking, and data analytics can be a daunting endeavor. The challenges that professionals face are diverse, ranging from resource constraints to the struggle of making evidence-based decisions using the wealth of data at their disposal.

At SafetyIQ, we understand that embracing an EHS system might raise questions about its intricacies, its ability to cater to unique requirements, and its effectiveness in simplifying data management and decision-making. These concerns are prevalent in a landscape where time and resources are often limited, and the complexity of EHS operations can be overwhelming.

Read on to see real-world insights and firsthand accounts of how we only provided solutions for our clients - not additional problems.

### Is an EHS System Confusing?

---

*"SafetyIQ has risen the bar and produced a great product for us. It's easy to use, produces easy-to-understand reports and from a site management level, I can edit what I need."*

**Shelby**  
**EHS Manager in the Utilities Sector**

*"I needed something that my crew could pick up and use without a lot of training and this is the one"*

**Jordan**  
**Safety Supervisor**

*"We had a difficult time getting our arms around all the moving parts - corrective actions, incident closeouts, management reporting, etc. SafetyIQ's platform rolls it up into one platform. Their one-stop-shop solution allowed for us to focus on our safety program instead of the daily fire drills."*

**Don S.**  
**Director of Risk Management Tier One Automotive Supplier**

## Does an EHS System actually meet your unique requirements?

---

*"Everything I've requested through the pilot phase has been or is getting addressed. There isn't anything I don't like about this company. It's made my life so much easier!"*

**Shelby**  
**EHS Manager in the Utilities Sector**

*"The software was easy to set-up using our existing inspection records and internal audits. Very customizable and changes can be made easily and are quick to be integrated into the system."*

**Jamie**  
**Safety Director in the Construction Industry**

*"What we liked the most about the software was the customer service received by the developers, and how they adapted the software to our needs. The developers demonstrated a very good knowledge about project management and understanding the needs PMT needs to make the general contractor meet project requirements. SafetyIQ also allows you to keep all information and safety observations organized in such way that you will never lose track of your items."*

**Juan**  
**Civil Engineering Coordinator in the Construction Industry**

*"SafetyIQ was easy to set up, customize to our project, and roll out to all levels of management."*

**Tommie**  
**Safety Manager in the Construction Industry**

*"Working with the SafetyIQ team has been a great experience. SafetyIQ takes the time to listen to your business needs, and then help come up with a solution. I love the flexibility to truly make the software what fits your business needs."*

**Clorrisa**  
**EHS Leader in the Plastics Sector**

*"The software support staff can help you adjust the software to fit almost any work process."*

**Thomas**  
**Corporate Director of Safety in the Mining & Metals Industry**

## Does an EHS System help with data management and use?

---

*“The web-based mobile app put daily safety documentation in the palm of their hands at the touch of a finger. This enabled me to get considerably more participation in accessing and enforcing our safety program over the 10.5 mile, 1200 worker, \$530M project by giving easy access to this tool to upper management and front line supervisors alike. All without adding to the stacks of paperwork they were already responsible for.”*

**Tommie**  
**Safety Manager in the Construction Industry**

*“It is a great tool to get the real focus on what is important for the safety process in any time. Easy to use and reliable, good performance, real-time graphs to analyze and a good tracking for action plans”*

**Miguel Angel**  
**HSE Manager at Michelin Construction Industry**

*“System is easy to use and has helped our safety program improve on reporting as well as communication to team members.”*

**Patricia**  
**Administrator of General Affairs in the Logistics & Supply Chain Sector**

*“Rather than relying on a single safety contact to undertake all safety procedures, employees can now manage audits, inspections, incidents, and observations in the field and from any device. This made their processes more efficient and engaged every employee in contributing to the overall health and safety.”*

**Matt Giordano**  
**HSE Manager at Palfinger**

*“I like the ability to assign and track tasks, analyze data, and record observations. Sending notifications from the system is also a very nice feature, and helps to track accountability with investigations and action items.”*

**Angela, Sr EHS Coordinator in the Automotive Sector**

# Fatigue: The Biggest Risk Across All Industries

Fatigue can be a challenge for many companies. Especially the ability to identify when your workers are struggling with alertness. For your travelling workers, being awake for 17 hours is the equivalent of a blood alcohol level of 0.05. Moreover, fatigue causes 20-30% of all accidents, and these accidents are twice as likely to be fatal. So have we actually improved fatigue management strategies for our clients?

Ventia came to us after a series of fatigue related incidents, and chose SafetyIQ to help mitigate this.

**Marco Waanders, General Manager of Camp Management responded in an interview:**

*“The highest risks within my operation are definitely driving-related. We had a series of fatigue-related incidents and I wasn’t happy with that.”*

*“We were looking for a competitive advantage when it came to implementing SafetyIQ and what we found was a 70% cost reduction straight-away and achieved higher compliance and safety improvements within that process.”*

*“The thing we’ve done really well as a company is the care and compassion. I want to make sure my workforce is safe, and at the end of the day, if you only save one person’s life, that’s a massive difference that you can feel good about yourself.”*

**Ventia Rig and Well Services haven’t had a fatigue related incident since implementing SafetyIQ in 2016.**

A transportation and Logistics company implementing our fatigue management solution to help identify at-risk drivers and prevent fatigue-related incidents.

*"If we could identify one driver not on their game, then it would be 100% worth it."*

*"The platform is really well aligned with our expectations and it allows us to have the technology behind what our drivers are doing as well as compliance with Department of Transport requirements."*

## User Feedback:

Helps to cope with exhaustion and fatigue.

Brandley Stead, Sandvik Rock Tools

It's a good tool to use to manage your fatigue and a good way of getting home safely.

Bobby B

## The Decision Factor

---

In the process of selecting a safety technology solution, organizations often grapple with a multitude of challenges. The search for a solution that aligns with unique requirements, provides robust support, addresses specific pain points, and fits within budget constraints can be a formidable undertaking.

At SafetyIQ, we understand the significance of these challenges, and we've witnessed how they can shape the decision-making process. Every organization's safety landscape is distinct, and the need for a solution that caters to these individual intricacies is paramount.

This section delves into the heart of the decision-making journey, as shared by our valued clients. Through their experiences, you'll gain insights into the criteria they prioritized when selecting a safety technology solution.

### Shamrock Civil Engineering

With a rapidly expanding mobile workforce, the management team at Shamrock Civil were genuinely concerned with the safety of their travellers. After doing their own research on different solutions they chose SafetyIQ:

*"SafetyIQ was chosen based upon a specific criterion around simplicity, speed of communication, efficient process for both travellers and managers, accuracy and timeliness of data and affordability."*

### BMD

BMD was looking for a system that was user-friendly and included support and training. With Projects spanning across the country in varying locations, SafetyIQ meets all of these criteria and provides a centralized platform that allows BMD's management to monitor team safety and staff movements.

*"BMD's expectation of SafetyIQ was met from its very first implementation; ease of sign-up and usability for all subcontractors was vital to its success."*

## Act For Kids - Featuring Renée McAllister

Act for Kids expanded over 250% within three months, and in the context of managing people's safety, the number of visits and long-distance travel increased significantly. Their processes soon became an extreme administrative burden and proved to be unreliable.

*"We were trying to manage our staff using our email system. As our team grew this became unmanageable and unsafe. Although no specific event occurred, there was a growing worry that our system was adding stress for our people rather than supporting them and that we wouldn't know if an incident occurred out in the field. Our only other option was to commence a whiteboard or paper-based system – which we thought would continue the inefficiency rather than improve the situation."*

After conducting research of products that were designed to support health and safety management activities, none could offer them the simplicity and affordability provided by SafetyIQ as an effective journey management solution. Act for Kids has now implemented SafetyIQ on a national scale.

## Channel Ship Services- Featuring Ryan Dunning

CSS Limited Operations Manager, Ryan Dunning identified SafetyIQ in 2017. After evaluating SafetyIQ's capability, the decision was made to onboard SafetyIQ as part of their core operation based on the following:

- *Global connectivity and communication capability via SMS and email*
- *Contractors required little or no training to understand how to use SafetyIQ*
- *Contractors have the independence to create, edit and manage their own journeys and check-ins*
- *Provided contractors with assurance that if they didn't check-in safely, a CSS representative would know instantly*
- *CSS have access to real-time data to track and manage each individual contractor's journey from start to finish, irrespective of where they are in the world*

## Clough - Featuring Roberta Selleck

Identified SafetyIQ as a cost-effective technology solution enabling the company to manage the risks associated with the various global and domestic scenarios that their workforce is exposed to.

Roberta Selleck, HSSE Manager at Clough listed our the key drivers for selecting SafetyIQ:

- *Proven global coverage using online web access, including GPS tracking*
- *Provides the business with the ability to set up team-based tracking and response – with robust, multi-layers' escalation process*
- *Reinforces personal accountability to travelers, including acknowledging 'safe arrival' at check points*
- *Is automated from corporate travel itineraries, but allows flexibility to add extra checkpoints– excellent for daily check-ins in high risk locations*
- *Allows remote journeys (drive in / drive out) to be captured*
- *Is compatible with standard smart phone technology.*
- *Imposes minimal additional administration requirement*

## Conclusion

In your hands, you hold more than just a compilation of feedback; you hold a road map to understanding how SafetyIQ can be the answer to your safety management challenges. Through these pages, we included stories of businesses that have navigated complex safety landscapes with newfound confidence, efficiency, and compliance – all through the utilization of our software.

We understand that choosing a software solution is a pivotal decision for your organization. It's not just about features and functionalities; it's about finding a partner that aligns with your goals and aspirations. Through this report, we aim to be that partner – one that speaks through the voices of our customers and offers you a glimpse of the success that awaits.

The SafetyIQ Testimonial Report isn't just a collection of words; it's a collection of experiences, insights, and victories. It's a bridge that connects you with fellow industry professionals who have walked the path you're about to tread. Their triumphs and challenges mirror the landscape you navigate, and their words carry the weight of authenticity that can guide your decision-making process.

Thank you for embarking on this journey with us. Your success story could very well be the next one we share.
