# Integration with Global Vehicle Telematics Devices

Combined people and vehicle data for complete worker visibility.
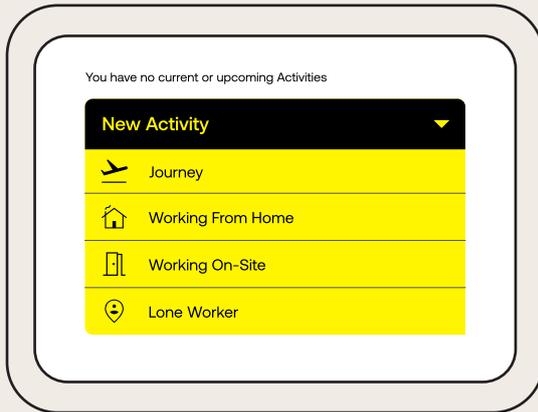

SafetyIQ and Vehicle Telematics, enables a seamless digitised Journey Management Plan for remote workers and a centralised dashboard for vehicle tracking.

- ☑ IVMS triggered escalation process
- ☑ Monitor workers from a centralised dashboard
- ☑ Real-time emergency response capabilities
- ☑ Time stamped audit logs

**User Logs Activity** → **Completes Risk Assessment** (optional) → **User Commences Activity** → **User Checks-In**

User Misses Check-In → **Alert Management**

User Selects Activity Type

Tracked via IVMS

Escalation Process

How it Works

①

You have no current or upcoming Activities

New Activity ▼

✈ Journey

🏠 Working From Home

🚪 Working On-Site

📍 Lone Worker

Self-Managed Activities

Users create a Journey and the integrations seamlessly connects the tracked vehicle to the Journey.

②

< 👤 +61 400 000 000 ⋮

SafetyIQ: Taylor Smith +61412829825 missed Check-In at [location]. Open SafetyIQ to view the Activity.

SafetyIQ: Escalation for Taylor Smith has been de-escalated. Reason: Checked-In. No further action is required.

## Monitoring Activities

If the Journey Escalates, a Manager can use the centralised map to view the last known location of the vehicle.
