# Journey Management Solution

Empowering companies with complete employee visibility.

SafetyIQ's Journey Management completely digitises paper-based forms and provides centralised visibility over all aspects of worker movements.

The mobile technology enables real-time responses and rapid communication that helps to reduce the number of accidents, injuries and delays amongst remote workers.

User Logs Activity → **Completes Risk Assessment** (optional) → **User Commences Activity** → **User Checks-In**

User Selects Activity Type

Approve/Deny Assessment

Tracked via IVMS (optional)

User Misses Check-In → **Alert Management**

Escalation Process

①

SafetyIQ Dashboard Map

The SafetyIQ dashboard map allows companies to view the geographic locations of where their workers have been, where they are currently and where they are going.

The dashboard map gives company leaders the ability to see where workers are from a birds eye view, or zoom into specific areas or locations to access worker activities.
